No part of this scoring system may be altered in any way. No part of this score chart may be altered or copied without express written permission from the Boone and Crockett Club. A score chart is not authenticated until signed and dated by a certified Boone and Crockett Club Official Measurer. No scores are official Boone and Crockett scores until verified and the trophy is accepted by the Boone and Crockett Club. All entries into Boone and Crockett Club’s Awards Programs are subject to verification.
As an Associate you will receive several benefits including:

- **FAIR CHASE MAGAZINE:** Published quarterly and dedicated to hunting and conservation of North American big game animals. *Fair Chase* is available to current Associates; it is not available on the newstand.

**WHAT YOU CAN EXPECT IN EACH ISSUE OF FAIR CHASE...**

- A dedicated section listing trophies recently accepted in the Club’s current Awards Program – a great reference guide, which can be used as a supplement to the last published database. Individual scoring database where searches field photos from the B&C Records are accepted in the Club’s current Awards Program.

- Feature articles about current topics of interest to today’s hunter written by well-known outdoor journalists, political events surrounding our hunting heritage and conservation policy, or scoring big game.

**YOU WILL ALSO RECEIVE:**

- Associates card
- Boone and Crockett window decal
- Access to the online Associates community: searchable field photos from the B&C Records database. Individual scoring database where you can score your trophies online. Electronic archives of past *Fair Chase* feature articles.
- A 20% discount on select Club publications and merchandise.

**JOIN THE ASSOCIATES PROGRAM TODAY!**

As an Associate you will receive several benefits including:

- **10% discount on select Club publications and merchandise.**
- **Searchable field photos from the B&C Records database.**
- **Feature articles about current topics of interest to today’s hunter written by well-known outdoor journalists, political events surrounding our hunting heritage and conservation policy, or scoring big game.**

**IT’S EASY... SIGN UP WITH YOUR TROPHY ENTRY!**

To join the Club’s Associates program and receive *Fair Chase* magazine quarterly, check the appropriate box on the reverse side of this form when you send in your trophy entry OR call toll-free (888)840-HUNT to sign up with a credit card.

**BOONE AND CROCKETT CLUB® INSTRUCTIONS FOR MEASURING ROOSEVELT’S AND TULE ELK**

All measurements must be made with a 1/4-inch wide flexible steel tape to the nearest one-eighth of an inch. (Note: A flexible steel cable can be used to measure points and main beams only.) Enter fractional figures in eighths, without reduction. Official measurements cannot be taken until the antlers have air dried at a habitable room temperature for at least 60 days after the animal was killed. The 60-day drying period for a trophy that has been frozen or boiled begins the day it is removed from the freezer, boiling pot, or submersion in any liquid.

A. **Number of Points on Each Antler:** to be counted a point, the projection must be at least one inch long, with length exceeding width at one inch in point of length. All points are measured from tip of point to closest edge of beam as illustrated. Beam tip is counted as a point but not measured as a point. **Point totals do not add into the final score.**

B. **Tip to Tip Spread:** is measured between tips of main beams. Tip to tip spread does not add into the final score.

C. **Greatest Spread:** is measured between perpendiculars at a right angle to the center line of the skull at widest part, whether across main beams or points. Greatest spread does not add into the final score.

D. **Inside Spread of Main Beams:** is measured at a right angle to the center line of the skull at widest point between main beams. Enter this measurement again as the Spread Credit if it is less than or equal to the length of the longer main beam; if greater, enter longer main beam length for Spread Credit.

E. **Total of Lengths of all Abnormal Points:** Abnormal Points are those non-typical in location or pattern occurring below G-4. Measure in usual manner and record in appropriate blanks. Note: do not confuse with Crown Points that may occur in the vicinity of G-4, G-5, G-6, etc.

F. **Leness of Main Beam:** is measured from the center of the lowest outside edge of burr over the outer side to the most distant point of the main beam. The point of beginning is that point on the burr where the center line along the outer side of the beam intersects the burr, then following generally the line of the illustration.

G. **Length of Normal Points:** The length of G-1 is then measured from the tip, over the curve, to the center of this point on the outer side. It is not taken over the curve to the burr.

H. **Length of Normal Points:** Normal points project from the top or front of the main beam in the general pattern illustrated. They are measured from nearest edge of main beam over outer curve to tip. Lay the tape along the outer curve of the beam so that the top edge of the tape coincides with the top edge of the beam on both sides of point to determine the baseline for point measurement. Record point lengths in appropriate blanks.

I. **Circumferences:** are taken as detailed in illustration for each measurement.

J. **Crown Points:** From the well-defined Royal on out to end of beam, all points other than the normal points in their typical locations are Crown Points. This includes points occurring on the Royal, on other normal points, on Crown Points, and on the bottom and sides of main beam after the Royal. Measure and record in appropriate blanks provided and add to score below.

**ENTRY REQUIREMENTS FOR BOONE AND CROCKETT TROPHIES**

Current original score chart, signed and dated by the Official Measurer.

$40 Entry Fee. The entry fee, which is nonrefundable, is payable in cash, personal check, money order, credit card, etc. It is waived for government fish and wildlife agencies, OfficialMeasurers, museums, educational institutions, etc.

Clearly focused photographs of trophy front, right side, and left side of horns or antlers. For skull, include photographs of front, top, right side, and left side. Digital photographs are acceptable, but must be high quality. 3"x4" or 4"x6" photos are preferred, either singly or all on a single 8.5"x11" sheet of glossy photo-grade paper.

**ENTRY AFFIDAVIT OR MATERIALS RELEASE FORM**

**ENTRY AFFIDAVIT** or Materials Release Form. The hunter’s signature on the Entry Affidavit must be witnessed by either an Official Measurer, notary public, or Commissioner of Oaths (Canada), or it is not acceptable. No Entry Affidavit is required for trophies of unknown origin, picked up, hunter deceased, purchased at flea markets, etc. However, a Materials Release Form, signed by the owner, is required for these trophies. The Materials Release Form is on the back of the score chart.

**HUNTER, GUIDE, AND HUNT INFORMATION FORM** or Narrative of the history of the trophy. A completed Hunter, Guide, and Hunt Information form is required even if the services of a guide were not employed on the hunt. The hunter simply needs to complete the parts of the HGH form that apply to his particular trophy.

**COPY OF HUNTING LICENSE/BIG-GAME TAG/SAVAGE PERMIT USED TO TAKE OR POSSESS THE TROPHY.** In lieu of a copy of the original license/tag, B&C will accept a statement from an appropriate Game and Fish Department official certifying that a license (and any required tags) was possessed by the hunter at the time the trophy was taken. If the Game and Fish Department no longer has records at its disposal to verify a license or tag, a written statement, on official letterhead, from game and fish personnel stating the fact that the license information is no longer available is acceptable. If a salvage or possession permit is required in the particular state for picked up trophies, submit a copy of that document or a letter stating it was issued if it is no longer available.

A narrative is required for trophies of unknown origin, picked up, hunter deceased, purchased at flea markets, etc. The narrative must include pertinent information about how the trophy was acquired, condition of trophy (if found), dates, bills of sale, etc. If a boundary is involved with the category (e.g. Columbia blacktail deer), the exact location where it came from must be included.

For more information about the Club’s Awards Program, downloadable score charts, weekly field photos, conservation projects and much more, check out the official B&C web site at www.booneandcrockettclub.com
