As an Associate you will receive several benefits including:

- **FAIR CHASE MAGAZINE**: Published quarterly and dedicated to hunting and conservation of North American big game animals. *Fair Chase* is available to current Associates; it is not available on the newsstand.

**WHAT YOU CAN EXPECT IN EACH ISSUE OF FAIR CHASE...**

- A dedicated section listing trophies recently accepted in the Club’s current Awards Program – a great reference guide, which can be used as a supplement to the last published records book by the Club.
- Several pages of outstanding field photos of trophy big game animals that have been accepted in the Club’s current Awards Program.
- Feature articles about current topics of interest to today’s hunter written by well-known outdoor journalists, political events surrounding our hunting heritage and conservation policy, or scoring big game.

**YOU WILL ALSO RECEIVE:**

- Associates card
- Boone and Crockett window decal
- Access to the online Associates community: searchable field photos from the B&C Records database. Individual scoring database where you can score your trophies online. Electronic archives of past *Fair Chase* feature articles.
- A 20% discount on select Club publications and merchandise.

**ENTRY REQUIREMENTS FOR BOONE AND CROCKETT TROPHIES**

- Current original score chart, signed and dated by the Official Measurer.
- $40 Entry Fee. The entry fee, which is nonrefundable, is payable in cash, personal check, money order, credit card, etc., as it is waived for government fish and wildlife agencies, Official Measurers, museums, educational institutions, etc.
- Clearly focused photographs of trophy front, right side, and left side of horns or antlers. For skull, include photographs of front, top, right side, and left side. Digital photographs are acceptable, but must be high quality. 3"x4" or 4"x6" photos are preferred, either singly or all on a single 8.5"x11" sheet of glossy photo-grade paper.
- Entry Affidavit or Materials Release Form. The hunter’s signature on the Entry Affidavit must be witnessed by either an Official Measurer, notary public, or Commissioner of Oaths (Canada), or it is not acceptable. No Entry Affidavit is required for trophies of unknown origin, picked up, hunter deceased, purchased at flea markets, etc. However, a Materials Release Form, signed by the owner, is required for these trophies. The Materials Release Form is on the back of the score chart.
- Hunter, Guide, and Hunt Information form or Narrative of the history of the trophy. A completed Hunter, Guide, and Hunt Information form is required even if the services of a guide were not employed on the hunt. The hunter simply needs to complete the parts of the HGH form that apply to his particular trophy.
- Copy of hunting license/big-game tag/salvage permit used to take or possess the trophy. In lieu of a copy of the original license/tag, B&C will accept a statement from an appropriate Game and Fish Department official certifying that a license (and any required tags) was possessed by the hunter at the time the trophy was taken. If the Game and Fish Department no longer has records at its disposal to verify a license purchase, a written statement, on official letterhead, from game and fish personnel stating the fact that the license information is no longer available is acceptable. If a salvage or possession permit is required in the particular state for picked up trophies, submit a copy of that document or a letter stating it was issued if it is no longer available.
- A narrative is required for trophies of unknown origin, picked up, hunter deceased, purchased at flea markets, etc. The narrative must include pertinent information about how the trophy was acquired, condition of trophy (if found), dates, bills of sale, etc. If a boundary is involved with the category (e.g. Columbia blacktail deer), the exact location where it came from must be included.

**BOONE AND CROCKETT CLUB® INSTRUCTIONS FOR MEASURING SHEEP**

All measurements must be made with a 1/4-inch wide flexible steel tape to the nearest one-eighth of an inch. Enter fractional figures in eighths, without reduction. Official measurements cannot be taken until the horns have air dried at a habitable room temperature for at least 60 days after the animal was killed. The 60-day drying period for a trophy that has been frozen or boiled begins the day it is removed from the freezer or boiling pot, or submersion in any liquid.

A. **Greatest Spread** is measured between perpendiculars at a right angle to the center line of the skull. *Greatest spread does not add into the final score.*

B. **Tip to Tip Spread** is measured between tips of horns. *Tip to tip spread does not add into the final score.*

C. **Length of Horn** is measured from the lowest point in front on outer curve to a point in line with tip. Do not press tape into depressions. The low point of the outer curve of the horn is considered to be the low point of the frontal portion of the horn, situated above and slightly medial to the eye socket (not the outside edge). Use a straight edge, perpendicular to horn axis, to end measurement on “broomed” horns.

D-1. **Circumference of Base** is measured at a right angle to axis of horn. Do not follow irregular edge of horn; the line of measurement must be entirely on horn material.

D-2-3-4. **Divide measurement C** of longer horn by four. Starting at base, mark both horns at these quarters (even though the other horn is shorter) and measure circumferences at these marks, with measurements taken at right angles to horn axis.
